UNITED STATES  
NUCLEAR REGULATORY COMMISSION

WASHINGTON, D.C. 20555-0001

CHAIRMAN

Mr. Vincent Tamagna  
Putnam County Legislature  
40 Gleneida Avenue  
Carmel, NY 10512

Dear Mr. Tamagna:

*concerning the*  
*writing to respond*  
I am ~~replying~~ to your letter of July 10, 2000, ~~to the members of the U.S. Nuclear Regulatory Commission regarding~~ replacement of the existing steam generators at Consolidated Edison Company of New York's (ConEd) Indian Point Nuclear Generating Unit No. 2 (IP2) subsequent to the steam generator tube failure on February 15, 2000.

The NRC shares your concern about the above event and recognizes the importance of ~~our~~ *no work* continued close attention to ConEd's corrective actions. As you are ~~aware~~, ConEd announced its decision to replace the existing steam generators before restarting the unit. ~~In this regard,~~ ConEd's steam generator replacement team, which includes Duke Energy Services and Morris-Knudsen, will start work by the end of the month. ConEd's ~~current schedule shows the~~ *plans to* completion *of* the replacement before the end of the year. The NRC staff will ~~be~~ focusing its oversight on ConEd's replacement work, monitoring the inspections of the new steam generators, and conducting inspection and assessment activities associated with the NRC's designation of IP2 as an "agency focus" plant.

-2-

I trust that this letter addresses your concerns. Thank you for your interest in this matter.

Sincerely,

Richard A. Meserve
