UNITED STATES NUCLEAR REGULATORY COMMISSIONCOMMONWEALTH EDISON COMPANYDOCKET NOS. 50-454 AND 50-455,NOTICE OF ISSUANCE AMENDMENT TOFACILITY OPERATING LICENSE

The U.S. Nuclear Regulatory Commission (Commission) has issued Amendment No. 36 to Facility Operating License Nos. NPF-37 and NPF-66 issued to the Commonwealth Edison Company, which revised the Technical Specifications for operation of the Byron Station, Units 1 and 2, located in Ogle County, Illinois. The amendments were effective as of the date of its issuance.

The amendments allow the use of Vantage 5 fuel.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Notice of Consideration of Issuance of Amendment and Opportunity for Hearing in connection with this was published in the FEDERAL REGISTER on September 11, 1989 (54 FR 37518). No request for a hearing or petition for leave to intervene was filed following this notice.

The Commission has prepared an Environmental Assessment and Finding of No Significant Impact related to the action and has concluded that an environmental impact statement is not warranted because there will be no environmental impact attributable to the action beyond that which has been predicted and described in the Commission's Final Environmental Statement for the facility dated April 1982.
