East Hartford, CT 06108

**SUBJECT: UNITED TECHNOLOGIES CORPORATION, ISSUANCE OF LICENSE
AMENDMENT, CONTROL NOS. 131104 AND 131105**

Dear Ms. Harvey:

This refers to your license amendment request. Enclosed with this letter is the amended license. The facilities at 415 Washington Avenue, North Haven, Connecticut and Divided Road, Rocky Hill, Connecticut may be released for unrestricted use.

We concluded that it is appropriate to release your North Haven and Rocky Hill, Connecticut facilities for unrestricted release for the following reasons: 1) your statement that licensed radioactive material had never been used or possessed at these two facilities (we reviewed all of our files on these licenses and also found no indications that licensed materials were actually used at these facilities); and, 2) the fact that your surveys did not detect the presence of licensed material. While the information presented in your survey results was helpful in reaching our decision, you should note, however, that the data, as presented, would not be adequate to demonstrate compliance with Subpart E of 10 CFR Part 20 (25 millirem). In order to demonstrate such compliance you must either use the screening criteria specified in the Notice at 65 FR 37186 (NUREG/CR-5512, Volume 3, Table 5.19) or show with appropriate models that the contamination levels you accept lead to a dose of less than 25 millirem (see also 63 FR 64132 and 64 FR 68395). The values cited for thorium in your request exceed the values in Table 5.19 and you did not provide additional justification for your limits. Since no licensed material was used or possessed at these facilities it is not necessary to demonstrate compliance with Subpart E. In your request you mention using MARSSIM and NUREG-5849 to prepare the survey plan. MARSSIM is now the accepted approach and should be used for future surveys.

Please review the enclosed document carefully and be sure that you understand and fully implement all the conditions incorporated into the amended license. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region I Office, Licensing Assistance Team, (610) 337-5239, so that we can provide appropriate corrections and answers.

J. Harvey
United Technologies Corporation

MATERIALS LICENSE

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974 (Public Law 93-438), and Title 10, Code of Federal Regulations, Chapter I, Parts 30, 31, 32, 33, 34, 35, 36, 39, 40, and 70, and in reliance on statements and representations heretofore made by the licensee, a license is hereby issued authorizing the licensee to receive, acquire, possess, and transfer byproduct, source, and special nuclear material designated below; to use such material for the purpose(s) and at the place(s) designated below; to deliver or transfer such material to persons authorized to receive it in accordance with the regulations of the applicable Part(s). This license shall be deemed to contain the conditions specified in Section 183 of the Atomic Energy Act of 1954, as amended, and is subject to all applicable rules, regulations, and orders of the Nuclear Regulatory Commission now or hereafter in effect and to any conditions specified below.

Amendment No. 15

12. The licensee is not required to file the reports described in 10 CFR 40.64(a), (b) or (c) for thorium contained in nickel-thorium alloys if the thorium content of the alloys does not exceed 4 percent by weight.
13. The licensee is authorized to transport licensed material in accordance with the provisions of 10 CFR Part 71, "Packaging and Transportation of Radioactive Material."
14. Except as specifically provided otherwise in this license, the licensee shall conduct its program in accordance with the statements, representations, and procedures contained in the documents, including any enclosures, listed below. The Nuclear Regulatory Commission's regulations shall govern unless the statements, representations, and procedures in the licensee's application and correspondence are more restrictive than the regulations.
- A. Application dated December 22, 1993
 - B. Letter dated April 25, 1995
 - C. Letter dated November 11, 1997
 - D. Letter dated September 30, 1997

For the U.S. Nuclear Regulatory Commission
