Subject: Cabot-Revere Paper: Aquatic Pathway

Garrett,

To follow-up: rather than saying "aquatic pathway," (in the paper) it may be better to just say something like "aquatic food ingestion pathway," or even "fish ingestion pathway" (not quite as technically precise, but an easy to understand description of what the pathway is). I did not find any standard terminology for this pathway, but one of these phrases would at least be more descriptive, and it would be easier to see the difference from the ground water pathway.

Duane.
