The DP is essentially tied up with the Comm package--I think technically we could write a separate letter approving the DP, but it would circumvent the purpose of the comm paper.

Effectively, that means the DP amendment may not go out until August. This is more a function of the fact that there is no clean up than indicative of any delay in completing before year end.

If the DP required cleanup, there would be a gap between DP approval and Comm paper. Without any remediation in between, approving the DP would be awkward, I believe, until the Comm Paper gets through.

Ted,

See attached.

I followed up with Garrett to check on the status of the paper awaiting an answer (I think it's still with OEDO).

Can you give me an answer to Larry's second question about the amendment going out in July, approving the DP? I don't recall the sequence of events, or whether the DP was tied up with the Commission Paper.

Scott

Status of the SDMP removal package? Has it left Garret Smith yet? Also, Op Plan shows issuance of license amendment to approve the DP in July--status? Thanks.
