SUBJECT: SUMMARY OF FEBRUARY 27, 2002, MEETING WITH NUCLEAR  
ENERGY INSTITUTE REGARDING OPERATOR LICENSING ISSUES

On February 27, 2002, the NRC staff participated in a public meeting with the Nuclear Energy Institute (NEI) in its offices at 1776 I Street (NW), Washington, DC, to discuss issues related to the implementation of Revision 8 of NUREG-1021, "Operator Licensing Examination Standards for Power Reactors." Attachment 1 lists the attendees at the meeting.

This was the latest in a series of public "focus group" meetings intended to promote the efficient, effective, and consistent preparation and administration of initial operator licensing examinations. The meeting focused primarily on the status of outstanding issues that had been raised during prior meetings, the last of which was held on August 16, 2001. (Refer to ADAMS Accession Number ML012640508 for a summary of that meeting). Attachment 2 is the agenda that was distributed during the meeting; the issues that were actually discussed are summarized in Attachment 3.

Representatives of the NRC and the industry agreed that this meeting was useful for the exchange of information on this subject.
