Dear Mr. Mayer:

The Commission has issued the enclosed Amendment No. 41 to Provisional Operating License No. DPR-22 for the Monticello Nuclear Generating Plant. The amendment adds license conditions relating to the completion of facility modifications for fire protection in response to your letters dated December 10, 1976, July 5, 1977, May 18, 1978, November 7, 1978, and January 4, 1979.

We have discussed the contents and conditions of this license amendment with members of your staff and we understand that you have agreed to this license amendment. Nevertheless, you understand that by the provisions of 10 CFR Part 2 paragraph 2.204, you may demand a hearing with respect to all or any part of the amendment within twenty (20) days from the date of the notice in the Federal Register of the issuance of this amendment. If you do not demand a hearing, this amendment will become effective on the expiration of that twenty (20) day period.

By Amendment No. 33 we issued Technical Specifications to incorporate limiting conditions for operation and surveillance requirements for existing fire protection systems. We request that you propose revised Technical Specifications related to facility modifications required by the enclosed amendment by July 1980.

We have determined that no license amendment fee is required to accompany your response to the aforementioned request. This determination is limited to those applications or requests to incorporate our recommended Technical Specifications and those to add surveillance and other requirements for operable systems that have been added at our request. Any other unrelated changes or requests that you might choose to include in the fire protection requests would be subject to amendment fees in accordance with Section 170.22 of 10 CFR Part 170.
