

March 29, 2002

The Honorable Steve Darrow  
P.O. Box 880-E  
Putney, VT 05346

SUBJECT: VERMONT YANKEE NUCLEAR POWER CORPORATION - ANNUAL  
ASSESSMENT OF SAFETY PERFORMANCE

Dear Representative Darrow:

I would like to personally invite you and other members of your organization to attend a meeting between the Nuclear Regulatory Commission (NRC) and Vermont Yankee Nuclear Power Corporation (VYNPC) in which the NRC staff will discuss with VYNPC our annual assessment of the safety performance of the Vermont Yankee station.

The meeting will be held at 1:00 p.m. on Tuesday, April 16, 2002, at the Governor Hunt House, 320 Governor Hunt Road in Vernon, Vermont, and is open to the public for observation. At the meeting we will briefly discuss our Reactor Oversight Process and then discuss with VYNPC our assessment of their safety performance of Vermont Yankee and their response to our assessment. The NRC staff will be available following the meeting to answer questions from you and members of the public regarding the safety performance of Vermont Yankee and the role of the NRC in ensuring safe plant operations.

The NRC recently completed its annual assessment of the safety performance of the Vermont Yankee station in accordance with the NRC Reactor Oversight Process. Our assessment used the most recent performance indicator data and inspection findings from April 1, 2001 through December 31, 2001. We described our assessment results in a letter to VYNPC on March 1, 2002; a copy of that letter is attached.

You can also become familiar with our Reactor Oversight Process, the information we used in our annual assessment, and the specific safety performance at the Vermont Yankee station through the NRC Web site. This information may be accessed at <http://www.nrc.gov/NRR/OVERSIGHT/ASSESS.index.html>

Your schedule permitting, I look forward to meeting you on April 16, 2002. In the interim, please do not hesitate to contact me at 610-337-5227, if I can be of further assistance to you.

Sincerely,

/RA/

Clifford J. Anderson, Chief  
Projects Branch 5  
Division of Reactor Projects

ASSESSMENT OF SAFETY PERFORMANCE

Dear Mr. Rusten:

I would like to personally invite you and other members of your organization to attend a meeting between the Nuclear Regulatory Commission (NRC) and Vermont Yankee Nuclear Power Corporation (VYNPC) in which the NRC staff will discuss with VYNPC our annual assessment of the safety performance of the Vermont Yankee station.

The meeting will be held at 1:00 p.m. on Tuesday, April 16, 2002, at the Governor Hunt House, 320 Governor Hunt Road in Vernon, Vermont, and is open to the public for observation. At the meeting we will briefly discuss our Reactor Oversight Process and then discuss with VYNPC our assessment of their safety performance of Vermont Yankee and their response to our assessment. The NRC staff will be available following the meeting to answer questions from you and members of the public regarding the safety performance of Vermont Yankee and the role of the NRC in ensuring safe plant operations.

The NRC recently completed its annual assessment of the safety performance of the Vermont Yankee station in accordance with the NRC Reactor Oversight Process. Our assessment used the most recent performance indicator data and inspection findings from April 1, 2001 through December 31, 2001. We described our assessment results in a letter to VYNPC on March 1, 2002; a copy of that letter is attached.

You can also become familiar with our Reactor Oversight Process, the information we used in our annual assessment, and the specific safety performance at the Vermont Yankee station through the NRC Web site. This information may be accessed at <http://www.nrc.gov/NRR/OVERSIGHT/ASSESS.index.html>

Your schedule permitting, I look forward to meeting you on April 16, 2002. In the interim, please do not hesitate to contact me at 610-337-5227, if I can be of further assistance to you.

Sincerely,

/RA/

Clifford J. Anderson, Chief  
Projects Branch 5  
Division of Reactor Projects
