Docket Nos. 50-254
and 50-265

REGULATORY DOCKET FILE COPY

Mr. Cordell Reed
Assistant Vice President
Commonwealth Edison Company
P. O. Box 767
Chicago, Illinois 60690

Dear Mr. Reed:

The Commission has issued the enclosed Amendment Nos. 52 and 49 to Facility Operating License Nos. DPR-29 and DPR-30 for the Quad Cities Nuclear Power Station, Units Nos. 1 and 2. The attached Safety Evaluation addresses your submittals dated March 29 and August 3, 1977, June 6, July 6, July 27, and November 30, 1978, March 29, April 5, and April 23, 1979, and our observations at the Quad Cities Station during the visit of August 21-25, 1978.

The amendments add license conditions relating to the completion of facility modifications and implementation of administrative controls for fire protection.

We have discussed the contents and conditions of these license amendments with members of your staff and we understand that you have agreed to these license amendments. Nevertheless, you understand that by the provisions of 10 CFR Part 2 paragraph 2.204, you may demand a hearing with respect to all or any part of the amendments within twenty (20) days from the date of this letter. If you do not demand a hearing these amendments will become effective on the expiration of that twenty (20) day period.

By letter dated March 22, 1978, we issued Technical Specifications to incorporate limiting conditions for operation and surveillance requirements for existing fire protection systems and administrative controls. You are requested to propose revised Technical Specifications related to facility modifications described herein and submit them for our review no later than 90 days before the modifications are implemented. Certain items listed in Section 3.0 of the enclosed Safety Evaluation are marked with an asterisk to indicate that the NRC staff will require additional information in the form of design parameters, test results, or acceptance criteria to assure that the design is acceptable prior to actual implementation of these modifications. We request that you submit this information no later than 90 days before the modifications are scheduled to be implemented.

7908170602

and those to add surveillance and other requirements for operable systems that have been added at our request. Any other unrelated changes or requests that you might choose to include in the fire protection requests would be subject to amendment fees in accordance with section 170.22 of 10 CFR Part 170.

A copy of the Notice of Issuance is also enclosed.

Sincerely,

Thomas A. Ippolito, Chief
Operating Reactors Branch #3
Division of Operating Reactors
