**Subject:** Accountability Drill Results

Con Edison completed an "unannounced" accountability drill this morning. The drill followed major changes in how personnel would report to the emergency response facilities, and was well publicized to occur on March 30 at 7:30 am. The drill was initiated at 7:10 am to make it unannounced.

Accountability was completed in about 33 minutes, which was over the 30 minute limit. Areas for improvement were identified. The access to the TSC/OSC became a choke point when 50+ mechanics responded there in addition to other ERO personnel. Con Edison plans to address this by having only the necessary number of mechanics (about 6) respond to the OSC, while the rest report to the assembly area at the EOF.
