Docket No. 50-461

Mr. Dale L. Holtzscher
Acting Manager - Licensing and Safety
Clinton Power Station
P. O. Box 678
Mail Code V920
Clinton, Illinois 61727

Dear Mr. Holtzscher:

SUBJECT: TECHNICAL SPECIFICATION CHANGE REQUEST TO REPLACE THE TITLE OF
"POWER PLANT MANAGER" WITH "MANAGER - CLINTON POWER STATION"
(TAC NO. 73797)

RE: Clinton Power Station, Unit No. 1

The Commission has issued the enclosed Amendment No. 26 to Facility Operating License No. NPF-62 for the Clinton Power Station, Unit No. 1. This amendment consists of changes to the Technical Specifications (TSs) in response to your application dated February 5, 1988.

This amendment revises Technical Specification Section 6 to replace the position title of "Power Plant Manager" with the correct and more specific title of "Manager - Clinton Power Station."

A copy of our Safety Evaluation is also enclosed. Notice of Issuance will be included in the Commission's biweekly Federal Register notice.

Sincerely,

John B. Hickman, Project Manager
Project Directorate III-2
Division of Reactor Projects III,
IV, V, and Special Projects

NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

ILLINOIS POWER COMPANY, ET AL.

DOCKET NO. 50-461

CLINTON POWER STATION, UNIT NO. 1

AMENDMENT TO FACILITY OPERATING LICENSE

Amendment No. 26
License No. NPF-62

1. The Nuclear Regulatory Commission (the Commission) has found that:
 - A. The application for amendment by Illinois Power Company* (IP) and Soyland Power Cooperative, Inc. (the licensees) dated February 5, 1988, complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations set forth in 10 CFR Chapter I;
 - B. The facility will operate in conformity with the application, the provisions of the Act, and the rules and regulations of the Commission;
 - C. There is reasonable assurance (i) that the activities authorized by this amendment can be conducted without endangering the health and safety of the public, and (ii) that such activities will be conducted in compliance with the Commission's regulations;
 - D. The issuance of this amendment will not be inimical to the common defense and security or to the health and safety of the public; and
 - E. The issuance of this amendment is in accordance with 10 CFR Part 51 of the Commission's regulations and all applicable requirements have been satisfied.
2. Accordingly, the license is amended by changes to the Technical Specifications as indicated in the attachment to this license amendment, and paragraph 2.C.(2) of Facility Operating License No. NPF-62 is hereby amended to read as follows:

*Illinois Power Company is authorized to act as agent for Soyland Power Cooperative, Inc. and has exclusive responsibility and control over the physical construction, operation and maintenance of the facility.

Technical Specifications

The Technical Specifications contained in Appendix A and the Environmental Protection Plan contained in Appendix B, as revised through Amendment No. 26, are hereby incorporated into this license. Illinois Power Company shall operate the facility in accordance with the Technical Specifications and the Environmental Protection Plan.

3. This license amendment is effective as of its date of issuance.

ADMINISTRATIVE CONTROLS

UNIT STAFF (Continued)

- f. Administrative procedures shall be developed and implemented to limit the working hours of unit staff who perform safety-related functions e.g., licensed Senior Operators, licensed Operators, health physicists, auxiliary operators, and key maintenance personnel.

The amount of overtime worked by unit staff members performing safety-related functions shall be limited in accordance with the NRC Policy Statement on working hours (Generic Letter No. 82-12).

Adequate shift coverage shall be maintained without routine heavy use of overtime. The objective shall be to have operating personnel work a normal 8-hour day, 40-hour week while the unit is operating. However, in the event that unforeseen problems require substantial amounts of overtime to be used, or during extended periods of shutdown for refueling, major maintenance, or major unit modifications, on a temporary basis the following guidelines shall be followed:

1. An individual should not be permitted to work more than 16 hours straight, excluding shift turnover time.
2. An individual should not be permitted to work more than 16 hours in any 24-hour period, nor more than 24 hours in any 48-hour period, nor more than 72 hours in any seven day period, all excluding shift turnover time.
3. A break of at least eight hours should be allowed between work periods, including shift turnover time.
4. Except during extended shutdown periods, the use of overtime should be considered on an individual basis and not for the entire staff on a shift.

Any deviation from the above guidelines shall be authorized by the Manager-Clinton Power Station or his deputy, or higher levels of management, in accordance with established procedures and with documentation of the basis for granting the deviation. Controls shall be included in the procedures such that individual overtime shall be reviewed monthly by the Manager-Clinton Power Station or his designee to assure that excessive hours have not been assigned. Routine deviation from the above guidelines is not authorized.

ADMINISTRATIVE CONTROLS

AUTHORITY

6.5.2.9 The NRAG shall report to and advise the Vice President on those areas of responsibility specified in Sections 6.5.2.7 and 6.5.2.8.

RECORDS

6.5.2.10 Records of NRAG activities shall be prepared, approved, and distributed as indicated below:

- a. Minutes of each NRAG meeting shall be prepared, approved, and forwarded to the Vice President within 14 days following each meeting.
- b. Reports of reviews encompassed by Specification 6.5.2.7 shall be prepared, approved, and forwarded to the Vice President within 14 days following completion of the review.
- c. Audit reports encompassed by Specification 6.5.2.8 shall be forwarded to the Vice President and to the management positions responsible for the areas audited within 30 days after completion of the audit by the auditing organization.

6.5.3 TECHNICAL REVIEW AND CONTROL

ACTIVITIES

Procedures required by Technical Specification 6.8 and other procedures which affect plant nuclear safety as determined by the Manager-Clinton Power Station and changes thereto, other than editorial or typographical changes, shall be reviewed as follows:

6.5.3.1 TECHNICAL REVIEW

- a. Each such procedure or procedure change shall be independently reviewed by an individual knowledgeable in the area affected other than the individual who prepared the procedure, or procedure change. The Manager-Clinton Power Station shall prior to implementation approve all plant procedures and changes thereto.
- b. Individuals responsible for reviews performed in accordance with Item 6.5.3.1a. above shall be members of the plant staff previously designated by the Manager-Clinton Power Station. Each such review shall include a determination of whether or not additional, cross-disciplinary, review is necessary. If deemed necessary, such review shall be performed by the review personnel of the appropriate discipline.

Individuals performing these reviews shall meet or exceed the qualifications stated in ANSI/ANS 3.1-1978 for the appropriate discipline.

ADMINISTRATIVE CONTROLS

TECHNICAL REVIEW (Continued)

- c. When required by 10 CFR 50.59, a safety evaluation to determine whether or not an unreviewed safety question is involved shall be included in the procedure or the procedure change review. If it is determined that an unreviewed safety question is not involved, a written safety evaluation to support that decision will be prepared and submitted to the FRG for review. Pursuant to 10 CFR 50.59, NRC approval of items involving unreviewed safety questions shall be obtained prior to the Manager-Clinton Power Station approval for implementation.
- d. Written records of reviews performed in accordance with Item 6.5.3.1.a. above, including recommendations for approval or disapproval, shall be prepared and maintained.

6.6 REPORTABLE EVENT ACTION

6.6.1 The following actions shall be taken for REPORTABLE EVENTS:

- a. The Commission shall be notified and a report submitted pursuant to the requirements of Section 50.73 to 10 CFR Part 50, and
- b. Each REPORTABLE EVENT shall be reviewed by the FRG, and submitted to the NRAG and the Vice President.

6.7 SAFETY LIMIT VIOLATION

6.7.1 The following actions shall be taken in the event a Safety Limit is violated:

- a. In accordance with 10 CFR 50.72, the NRC Operations Center shall be notified by telephone as soon as possible and in all cases within 1 hour after the violation has been determined. The Vice President and the NRAG shall be notified within 24 hours.
- b. A License Event Report shall be prepared in accordance with 10 CFR 50.73.
- c. A Safety Limit Violation Report shall be prepared. The report shall be reviewed by the FRG. This report shall describe (1) applicable circumstances preceding the violation, (2) effects of the violation upon unit components, systems, or structures, and (3) corrective action taken to prevent recurrence.
- d. The Safety Limit Violation Report shall be submitted to the Commission within 30 days and to the NRAG, and the Vice President within 30 days of the violation.
- e. Critical operation of the unit shall not be resumed until authorized by the Commission.

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

SAFETY EVALUATION BY THE OFFICE OF NUCLEAR REACTOR REGULATION
SUPPORTING AMENDMENT NO. 26 TO FACILITY OPERATING LICENSE NO. NPF-62
CLINTON POWER STATION, UNIT NO. 1
ILLINOIS POWER COMPANY
DOCKET NO. 50-461

1.0 INTRODUCTION

By letter dated February 5, 1988, the Illinois Power Company (IP), et al. (the licensees) requested an amendment to Facility Operating License No. NPF-62 for the Clinton Power Station, Unit 1. The proposed amendment would revise Technical Specification Section 6 to replace the position title of "Power Plant Manager" with the correct and more specific title of "Manager - Clinton Power Station."

2.0 EVALUATION

On pages 6-2, 6-13, and 6-14, the position title of "Power Plant Manager" is used several times. The correct title as used elsewhere in the Technical Specification and in Chapter 13 of the Updated Safety Analysis Report (USAR) is "Manager - Clinton Power Station." The licensee proposes to revise the subject pages to achieve consistency throughout the Technical Specifications. The change will not affect the duties or responsibilities of the position. Moreover, it clarifies the Technical Specifications by providing a more specific and clear position title.

3.0 ENVIRONMENTAL CONSIDERATION

The amendment relates to changes in recordkeeping, reporting, or administrative procedures or requirements. Accordingly, the amendment meets the eligibility criteria for categorical exclusion set forth in 10 CFR Section 51.22(c)(10). Pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared in connection with the issuance of the amendment.

4.0 CONCLUSION

The proposed change to Technical Specification Section 6 to replace the position title of "Power Plant Manager" with the correct and more specific title of "Manager - Clinton Power Station" is acceptable. The change would provide consistency in the Technical Specifications and the USAR and is a more specific title.

8908310184 890822
PDR ADOCK 05000461
P FDC

We have concluded, based on the considerations discussed above, that: (1) there is reasonable assurance that the health and safety of the public will not be endangered by operation in the proposed manner, (2) such activities will be conducted in compliance with the commission's regulations, and (3) the issuance of this amendment will not be inimical to the common defense and security or to the health and safety of the public.
