

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555
July 26, 1988

MEMORANDUM FOR: Sholly Coordinator

FROM: Janice A. Stevens, Project Manager
Project Directorate III-2
Division of Reactor Projects - III,
IV, V and Special Projects

SUBJECT: REQUEST FOR PUBLICATION IN BI-WEEKLY FR NOTICE - NOTICE
OF CONSIDERATION OF ISSUANCE OF AMENDMENT TO FACILITY
OPERATING LICENSE AND PROPOSED NO SIGNIFICANT HAZARDS
CONSIDERATION DETERMINATION AND OPPORTUNITY FOR A HEARING
(TAC 68637)

Illinois Power Company, Soyland Power Cooperative, Inc., Western Illinois
Power Cooperative, Inc., (the licensees), Docket No. 50-461, Clinton Power
Station, Unit No. 1, DeWitt County, Illinois

Date of application for amendment: February 23, 1988, as supplemented
March 30, 1988

Description of amendment request: This proposed amendment would revise
Technical Specification Figure 6.2.2-1 and Sections 6.3.1 and 6.5.1.2
concerning the Clinton Power Station onsite organizational structure. The
proposed changes are the result of a proposed organizational restructuring by
the licensee.

This amendment includes proposed changes to Figure 6.2.2-1, "Unit Onsite
Organization," Specification 6.3.1, "Unit Staff Qualifications," and
Specification 6.5.1.2, "Facility Review Group (FRG) Composition." The
following changes are proposed to the onsite organizational structure:

- The position of Technical Advisor to the Plant Manager is no longer
justified and should be deleted.
- The position of Director-Plant Radiation Protection should be retitled
Assistant Manager-Plant Radiation Protection.

- The position of Director-Plant Technical should be retitled Assistant Manager-Plant Technical.
- The positions of Supervisor-Chemistry and Supervisor-Radwaste should report to the Assistant Manager-Plant Technical.
- The positions of Supervisor-Computer and Supervisor-Systems should be transferred to the Nuclear Station Engineering department and are no longer a part of the Unit Onsite Organization.
- The position of Assistant Supervisor-Plant Support Services should be established and the position of Administrative Supervisor should be deleted.
- The position of Supervisor-Industrial Safety should report to the Supervisor-Plant Support Services.
- A note should be added to the position of Assistant Manager - Plant Operations to indicate that this position requires the individual to have had a CPS SRO license.

The position of Director-Plant Radiation Protection should be changed to Assistant Manager-Plant Radiation Protection in Specification 6.3.1. The positions of Director-Plant Technical and Director-Plant Radiation Protection should be changed to Assistant Manager-Plant Technical and Assistant Manager-Plant Radiation Protection in Specification 6.5.1.2.

Basis for Proposed No Significant Hazards Consideration Determination: The staff has evaluated this proposed amendment and determined that it involves no significant hazards considerations. According to 10 CFR 50.92(c), a proposed amendment to an operating license involves no significant hazards considerations if operation of the facility in accordance with the amendment would not:

- 1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or
- 2) Create the possibility of a new or different kind of accident from any accident previously evaluated; or
- 3) Involve a significant reduction in a margin of safety.

The proposed amendment does not involve a significant increase in the probability or consequences of an accident previously evaluated. This is an administrative change that does not affect current accident analyses.

The proposed changes to Figure 6.2.2-1 and Sections 6.3.1 and 6.5.1.2 are administrative changes that clarify but do not change the intent of the Specifications. The proposed changes do not create the possibility of a new or different kind of accident from any previously evaluated. The proposed changes are administrative changes only and thus do not involve any design changes, new requirements, or new modes of operation.

The proposed changes do not involve a significant reduction in a margin of safety. The intent of the existing Technical Specification requirements would remain unchanged. The proposed changes to Figure 6.2.2-1 and Sections 6.3.1 and 6.5.1.2 are administrative changes that do not affect a margin of safety.

For the reasons stated above, the staff believes this proposed amendment involves no significant hazards considerations.
