Indiana & Michigan Power Company
ATTN: John A. Tillinghast
Vice President
P. O. Box 13
Bowling Green Station
New York, New York 10004

Gentlemen:

In response to your letter dated July 2, 1975, the NRC staff has issued Amendment No. 9 with its attachment, Change No. 9 to Facility Operating License No. DPR-53. This change revises a table in the Appendix B. Environmental Technical Specifications for the license.

The amendment recognizes the adequacy of the Essential Service Water System monitor and the Component Cooling Water monitor, in conjunction with a plan for grab sample analysis when necessary, in meeting the requirement for a monitor at the service water discharge pipe.

The staff has evaluated the potential environmental impact of operating the plant in accordance with this amendment and has concluded that there will be no change in effluent types or total amounts nor an increase in power level, and will not result in any significant environmental impact. Having made this determination, the Commission has further concluded, pursuant to 10 CFR 51.5(d)(4), that an environmental statement, negative declaration or environmental impact appraisal need not be prepared in connection with the issuance of these amendments.

The amendment does not involve new safety information of a type not considered by a previous Commission safety review of the facility. It does not involve a significant increase in the probability or consequences of an accident, does not involve a significant decrease in a safety margin, and therefore, does not involve a significant hazards consideration. The Commission has also concluded that there is reasonable assurance that the health and safety of the public will not be endangered by the proposed action.

This amendment and the associated revised page to the Appendix B Environmental Technical Specifications are enclosed together with the related Federal Register Notice.

Sincerely,

151

Voss A. Moore, Jr., Assistant Director
for Environmental Projects
Division of Site Safety and
and Environmental Analysis

DOCKET NO. 50-315

DONALD C. COOK NUCLEAR PLANT, UNIT 1

AMENDMENT TO FACILITY OPERATING LICENSE

Amendment No. 9
License No. DPR-58

1. The Nuclear Regulatory Commission (the Commission) has found that:
 - A. The application for amendment by the licensee dated July 2, 1975, complied with the standards and requirements of the Atomic Energy Act of 1954, as amended, (the Act) and the Commission's rules and regulations set forth in 10 CFR Chapter I;
 - B. The facility will operate in conformity with the license, the provisions of the Act, and the rules and regulations of the Commission;
 - C. There is reasonable assurance (i) that the activities authorized by this amendment can be conducted without endangering the health and safety of the public, and (ii) that such activities will be conducted in compliance with the Commission's regulations; and
 - D. The issuance of this amendment will not be inimical to the common defense and security or to the health and safety of the public.
2. Accordingly, Paragraph 2.C(2) of Facility License No. DPR-58 is hereby amended to read as follows:

"(2) Technical Specifications

The Technical Specifications contained in Appendices A and B, as revised, are hereby incorporated in the license. The licensee shall operate the facility in accordance with the Technical Specifications, as revised by issued changes thereto through Change No. 9."
