Dear Dr. Mott:

As follow-up to my letter of February 28, 1980, enclosed for your information is documentation provided by the New York State Department of Labor regarding the decontamination of the General Telephone & Electronics (GTE) Laboratories facility in Bayside, New York. The Labor Department advises us that this is the same facility which was previously known as Sylvania Laboratories. Also enclosed is a copy of the radioactive materials license (License No. 744-0085) issued by the Labor Department to GTE. As you will note, the license was terminated following Labor Department's verification of decontamination.

If you have any questions regarding this matter, please contact me or Jack Spath.

Sincerely,

T. K. DeBoer  
Director of Nuclear Operations

TKD/JPS/amm
