This high-level radioactive waste material demands exceptional care in all facets of its storage and disposal, including the transportation of this material; and

Whereas, In 1982, Congress passed the Nuclear Waste Policy Act of 1982. This legislation requires the federal government, through the U.S. Department of Energy, to build a facility for the permanent storage of high-level nuclear waste. This act, which was amended in 1987, includes a specific timetable to identify a suitable location and to establish the waste facility. The costs for this undertaking are to be paid from a fee that is assessed on all nuclear energy produced; and

Whereas, In accordance with the federal act, Michigan electric customers have paid \$405.8 million into this federal fund for construction of the federal waste facility; and

Whereas, There are serious concerns that the federal government is not complying with the timetables set forth in federal law. The U.S. Department of Energy, working with the Nuclear Regulatory Commission must not fail to meet its obligation as provided by law. There is too much at stake; now, therefore, be it
