By letter dated August 13, 1979, we issued an amendment to the Dresden Unit No. 3 Technical Specifications. The amendment changed the withdrawal schedule of the pressure vessel surveillance capsules to be in conformance with 10 CFR 50, Appendix H.

In issuing the amendment, we incorrectly identified one of the two standby test capsules. Please correct this error by replacing the existing page 94A of the Technical Specifications with the enclosed page 94A. We regret any inconvenience caused by this oversight.

Sincerely,

Original signed by

Thomas A. Ippolito, Chief
Operating Reactors Branch #3
Division of Operating Reactors
