Docket No. 50-249

Commonwealth Edison Company  
ATTN: Mr. L. D. Butterfield, Jr.  
Nuclear Licensing Administrator  
Post Office Box 767  
Chicago, Illinois 60690

Gentlemen:

On May 13, 1972, the Commission amended its regulations contained in 10 CFR Part 50 to revoke paragraph A.13 of Appendix D which had required the Commission to impose a condition in facility operating licenses requiring licensees to comply with such standards and requirements as set by Federal and State law for the protection of the environment. Since this condition is no longer required, we have issued the enclosed Amendment No. 2 to Facility Operating License No. DPR-25 to delete it from the license.

Deletion of this condition does not relieve you of any obligation which you otherwise have in regard to applicable standards and requirements imposed by other agencies under Federal or State law.

Sincerely,

Original Signed By

A. Giambusso

for Reactor Projects
