Docket No.: 50-373

Mr. Louis O. DeGeorge  
Director of Nuclear Licensing  
Commonwealth Edison Company  
P. O. Box 767  
Chicago, Illinois 60690

Dear Mr. DeGeorge:

Subject: Amendment No. 8 to Facility Operating License No. NPF-11 - La Salle  
County Station, Unit 1

The U. S. Nuclear Regulatory Commission has issued the enclosed Amendment No. 8 to Facility Operating License No. NPF-11 for the La Salle County Station, Unit 1. This Amendment grants a temporary exemption from 10 CFR Part 55 licensing requirement, and also consists of a change to the Technical Specifications in response to your application dated September 8, 1982. The exemption and the change to the Technical Specifications is to revise temporarily the qualification requirements for the position of Operating Assistant Superintendent.

By letters dated August 30, 1982 and September 8, 1982, Commonwealth Edison informed us that it was considering promoting the current Assistant Superintendent of Operations at the La Salle County Station to the position of Station Superintendent. The individual being considered to fill the vacant position as a result of this promotion has been employed by Commonwealth Edison for over 15 years, was a Senior Reactor Operator (SRO) licensed at the Dresden Station and held positions at other Commonwealth Edison Stations as Technical Staff Supervisor, Operating Engineer, and Operating Assistant Superintendent. We were also informed that currently this individual does not hold an SRO license at La Salle as required by the current Technical Specifications for the Assistant Superintendent of Operations at La Salle.

In view of the experience of the individual being considered for this position, we conclude that your request for an exemption to place this individual in this position for a limited time prior to obtaining an SRO license at La Salle is authorized by law and will not endanger life or property and are otherwise in the public interest. Also the changes to the Technical Specifications are acceptable.

We have determined that the Amendment does not involve a change in effluent types or total amounts nor an increase in power level and will not result in any significant environmental impact. Having made this determination, we have further concluded that the Amendment involves an action which is insignificant from the standpoint of environmental impact and pursuant to 10 CFR Section 51.5(d)(4) that an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in

OFFICE	connection with the issuance of this Amendment.

We have concluded, based on the considerations discussed above, that: (1) because the amendment does not involve a significant increase in the probability or consequences of accidents previously considered, does not create the possibility of an accident of a type different from any evaluated previously, and does not involve a significant decrease in a safety margin, the Amendment does not involve a significant hazards consideration, (2) there is reasonable assurance that the health and safety of the public will not be endangered by operation in the proposed manner, and (3) such activities will be conducted in compliance with the Commission's regulations and the issuance of this Amendment will not be inimical to the common defense and security or to the health and safety of the public.

A copy of a related Notice of Issuance is also enclosed.

Sincerely,

Original signed by  
Darrell G. Eisenhut

COMMONWEALTH EDISON COMPANY

DOCKET NO. 50-373

LA SALLE COUNTY STATION, UNIT 1

AMENDMENT TO FACILITY OPERATING LICENSE

License No. NPF-11  
Amendment No. 8

1. The Nuclear Regulatory Commission (the Commission or the NRC) having found that:
  - A. The application for amendment filed by the Commonwealth Edison Company, dated September 21, 1982, complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations set forth in 10 CFR Chapter I;
  - B. The facility will operate in conformity with the application, the provisions of the Act, and the regulations of the Commission;
  - C. There is reasonable assurance: (i) that the activities authorized by this amendment can be conducted without endangering the health and safety of the public, and (ii) that such activities will be conducted in compliance with the Commission's regulations; set forth in 10 CFR Chapter I;
  - D. The issuance of this amendment will not be inimical to the common defense and security or to the health and safety of the public; and
  - E. The issuance of this amendment is in accordance with 10 CFR Part 51 of the Commission's regulations and all applicable requirements have been satisfied.

2. Accordingly, the license is amended by changes to the Technical Specifications as indicated in the attachment to this license amendment and paragraph 2.C.(2) of the Facility Operating License No. NPF-11 is hereby amended to read as follows:

(2) Technical Specifications

The Technical Specifications contained in Appendix A, as revised through Amendment No. 8, and the Environmental Protection Plan contained in Appendix B, are hereby incorporated in the license. The licensee shall operate the facility in accordance with the Technical Specifications.

6-1(a)

## 6.0 ADMINISTRATIVE CONTROLS

### 6.1 ORGANIZATION, REVIEW, INVESTIGATION, AND AUDIT

- A. The Station Superintendent shall have overall full-time responsibility for safe operation of the facility. During periods when the Station Superintendent is unavailable, he shall designate this responsibility to an established alternate who satisfies the ANSI N18.1 of March 8, 1971 experience requirements for plant manager.

The Shift Supervisor shall be responsible for directing and commanding the overall operation of the facility on his shift. The primary management responsibility of the Shift Supervisor shall be for safe operation of the nuclear facility on his shift under all conditions. A management directive signed by Division Vice President - Nuclear Stations emphasizing this primary management responsibility and that clearly establishes the command duties of the Shift Supervisor shall be reissued to all station personnel on an annual basis.

- B. The corporate management which relates to the operation of this station is shown in Figure 6.1-1.
- C. The normal functional organization for operation of the station shall be as shown in Figure 6.1-2.\*\* The shift manning for the station shall be as shown in Figure 6.1-3. The individual filling the position of Assistant Superintendent, Administrative and Support Services, shall meet the minimum acceptable level for "Technical Manager" as described in Section 4.2.4 of ANSI N18.1-1971.
1. At least one licensed Reactor Operator shall be in the control room when fuel is in the reactor. In addition, while the reactor is in OPERATIONAL CONDITION 1, 2 or 3, at least one licensed Senior Reactor Operator who has been designated by the Shift Supervisor to assume the control room direction responsibility shall be in the Control Room.
  2. A health physics technician\* shall be on site when fuel is in the reactor.
  3. All CORE ALTERATIONS shall be observed and directly supervised by either a licensed Senior Reactor Operator or Senior Reactor Operator Limited to Fuel Handling who has no other concurrent responsibilities during this operation.
  4. A site Fire Brigade of at least 5 members shall be maintained onsite at all times\*. The Fire Brigade shall not include the Shift Supervisor, the Station Control Room Engineer and the 2 other members of the minimum shift crew necessary for safe shutdown of the unit and any personnel required for other essential functions during a fire emergency.

---

\* The health physics technician and Fire Brigade composition may be less than the minimum requirements for a period of time not to exceed two hours in order to accommodate unexpected absence provided immediate action is taken to fill the required positions.

\*\* See next page 6-1a

**\*\*Figure 6.1-2 indicates that the Operating Assistant Superintendent is required to hold an SRO license. The following exemption from this requirement is authorized. until September 30, 1983:**

**An individual who meets the requirements of ANSI N18.1-1971, for the ANSI positions of Plant Manager and Operations Manager, with the sole exception that he does not hold a current SRO license at LaSalle, will be allowed to assume the position of Operating Assistant Superintendent, providing**

- a. He sits for the SRO examination at LaSalle no later than the first opportunity after six months following his appointment to the position.**
- b. Operating decisions made by this individual prior to his holding a current SRO at LaSalle shall be approved by, or directed through, individual(s) holding a current SRO license at LaSalle.**

UNITED STATES NUCLEAR REGULATORY COMMISSION

DOCKET NO. 50-373

COMMONWEALTH EDISON COMPANY

NOTICE OF ISSUANCE OF AMENDMENT OF FACILITY OPERATING LICENSE

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 8 to Facility Operating License No. NPF-11, issued to Commonwealth Edison Company, which revised Technical Specifications for operation of the La Salle County Station, Unit No. 1 (the facility) located in Brookfield Township, La Salle County, Illinois. The Amendment is effective as of the date of issuance.

The Amendment consists of a revision to the license in that the completion dates of the Safety Parameter Display System and Emergency Operations Facility were changed from October 1, 1982 to December 31, 1982.

The application for amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter 1, which are set forth in the license amendment. Prior public notice of this Amendment was not required since the Amendment does not involve a significant hazards consideration.
