Docket No. 50-373

Mr. Louis O. DelGeorge
Director of Licensing
Commonwealth Edison Company
P. O. Box 767
Chicago, Illinois 60690

Dear Mr. DelGeorge:

Subject: Additional License Condition for License No. NPF-11,
LaSalle County Station, Unit 1

As a result of investigations relating to allegations made by the Attorney General of Illinois and Illinois Friends of the Earth, Region III questioned the adequacy of torquing of bolting. In order to provide additional assurance, we requested you to perform the following action:

Prior to exceeding 5 percent power, check the torque on non-pressure boundary bolts (bolts whose failure will affect the operability of the valve) on each safety-related valve located inside the primary containment. Within six months, a similar program be completed for the safety-related valves located outside containment.

We have received confirmation from Region III that the torque on non-pressure boundary bolts inside containment has been successfully completed. Therefore for valves outside containment, as indicated by telecon held July 14, 1982 please submit the following additional license condition for License No. NPF-11 for LaSalle Unit 1:

Prior to January 15, 1985, the licensee shall check the torque on all non-pressure boundary bolts (bolts whose failure will affect the operability of the valve) on each safety-related valve located outside containment.

If you desire any clarification, please contact A. Bournia at (301) 492-8196.

Sincerely,

AS

A. Schwencer, Chief
