Docket Nos. 50-237/249  
LS05-84-08-009

Mr. Dennis L. Farrar  
Director of Nuclear Licensing  
Commonwealth Edison Company  
Post Office Box 767  
Chicago, Illinois 60690

Dear Mr. Farrar:

SUBJECT: REFORMATTED TECHNICAL SPECIFICATIONS

Re: Dresden Nuclear Power Station, Unit Nos. 2 and 3

The Commission has issued the enclosed Amendment No. 82 to Provisional Operating License No. DPR-19 for Dresden Unit 2 and Amendment No. 75 to Facility Operating License No. DPR-25 for Dresden Unit 3. The amendments consist of changes to the Technical Specifications in response to your application dated June 11, 1984.

The amendments authorize approval of new versions of the Technical Specifications for Dresden Units 2 and 3. The Technical Specifications are revised, without changing the technical content, into a format which will have and continue to have in the future improved legibility and versatility.

The staff reviewed the new versions of the Technical Specifications by comparing them, word for word, with the present License Authority copies. During this review process, typographical and minor grammatical errors which appeared in the present License Authority copies were corrected. Page changes when future amendments are submitted will be greatly simplified and textual clarity will be enhanced. As indicated above, there are no changes in the technical content.

This amendment involves changes in the recordkeeping, reporting, and administrative procedures and requirements. Accordingly, this amendment meets the eligibility criteria for categorical exclusion set forth in 10 CFR 51.22(c)(10). Pursuant to 10 CFR 51.22(b) no environmental impact statement or environmental assessment need be prepared in connection with the issuance of this amendment.

The staff has concluded, based on the considerations discussed above, that: (1) there is reasonable assurance that the health and safety of the public will not be endangered by operation in the proposed manner, and (2) such activities will be conducted in compliance with the Commission's regulations and the issuance of these amendments will not be inimical to the common defense and security or to the health and safety of the public.

A Notice of Consideration of Issuance of Amendments to License and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing related to the requested action was published in the Federal Register on July 3, 1984 (49 FR 27385). No request for hearing was received and no comments were received.

This action will appear in the Commission's Monthly Notice publication in the Federal Register.

Sincerely,
