

October 17, 1995

Mr. D. L. Farrar
Manager, Nuclear Regulatory Services
Commonwealth Edison Company
Executive Towers West III
1400 Opus Place, Suite 500
Downers Grove, IL 60515

SUBJECT: PARTIAL IMPLEMENTATION OF AMENDMENT - DRESDEN NUCLEAR POWER STATION,
UNITS 2 AND 3 AND QUAD CITIES NUCLEAR POWER STATION, UNITS 1 AND 2
(TAC NOS. M92928, M92929, M84319 AND M84320)

Dear Mr. Farrar:

The Commission issued Amendment Nos. 137 and 131 to Appendix A of Facility Operating License Nos. DPR-19 and DPR-25 and Amendment Nos. 158 and 154 to Facility Operating License Nos. DPR-29 and DPR-30 on July 27, 1995. By letter dated August 3, 1995, Commonwealth Edison Company informed the Commission that it would implement the portion of the amendment relating to the scram time testing of control rods (Technical Specification Upgrade Program (TSUP) Surveillance Requirement (SR) 4.3.D.3) prior to implementation of the remaining portions of the amendments. The licensee will implement this new SR as Technical Specification (TS) 4.3.C.2. The staff has reviewed the TS pages that include the revised SR. These TS pages should adequately control the partial implementation. It is the staff's understanding that no other portions of Amendment Nos. 137, 131, 158, or 154 will be implemented until full implementation of the TSUP. Also in the August 3, 1995, letter, the licensee formally withdrew a supplemental amendment request dated July 19, 1995, which requested expedited approval of TSUP 4.3.D.3. Upon issuance of the above listed amendments, the supplemental amendment request was no longer necessary.

Sincerely,

Original signed by

John F. Stang, Senior Project Manager
Project Directorate III-2
Division of Reactor Projects - III/IV
Office of Nuclear Reactor Regulation
