Dear Mr. Williams:

SUBJECT: AMENDMENT NO. 89 TO FACILITY OPERATING LICENSE NO. NPF-3;  
POSITION TITLE

The Commission has issued Amendment No. 89 to Facility Operating License No. NPF-3 for the Davis-Besse Nuclear Power Station, Unit No. 1. This amendment consists of changes to the Appendix A Technical Specifications (TSs) in response to your application dated December 16, 1984 (No. 1109).

This amendment modifies paragraph 6.4.1 of the TSs to specify that the retraining and replacement training program for the facility staff is under the direction of the Nuclear Training Manager. Previously no position title was shown in paragraph 6.4.1.

We have reviewed your submittal and find that your proposed TS modification is solely to correct an oversight which occurred when the TSs were initially adopted in that the position title was omitted inadvertently. The position title added to paragraph 6.4.1 is consistent with the offsite organization chart shown on Figure 6.2-1 of the TSs. The offsite organization was reviewed previously and found to be acceptable by Amendment No. 76 dated November 5, 1984. The addition of the title of Nuclear Training Manager defines the responsibility for nuclear training. You have stated that the addition does not change any duties or responsibilities. We find the proposed change acceptable.

This amendment relates to changes in administrative procedures or requirements. Accordingly, this amendment meets the eligibility criteria for categorical exclusion set forth in 10 CFR 51.22(c)(10). Pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared in connection with the issuance of this amendment.

We have concluded, based on the considerations discussed above, that: (1) there is reasonable assurance that the health and safety of the public will not be endangered by operation in the proposed manner, and (2) such activities will be conducted in compliance with the Commission's regulations and the issuance of this amendment will not be inimical to the common defense and security or to the health and safety of the public.

AMENDMENT TO FACILITY OPERATING LICENSE

Amendment No. 89  
License No. NPF-3

1. The Nuclear Regulatory Commission (the Commission) has found that:
  - A. The application for amendment by the Toledo Edison Company and The Cleveland Electric Illuminating Company (the licensees) dated December 16, 1984, complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act) and the Commission's rules and regulations set forth in 10 CFR Chapter I;
  - B. The facility will operate in conformity with the application, the provisions of the Act, and the rules and regulations of the Commission;
  - C. There is reasonable assurance (i) that the activities authorized by this amendment can be conducted without endangering the health and safety of the public, and (ii) that such activities will be conducted in compliance with the Commission's regulations;
  - D. The issuance of this amendment will not be inimical to the common defense and security or to the health and safety of the public; and
  - E. The issuance of this amendment is in accordance with 10 CFR Part 51 of the Commission's regulations and all applicable requirements have been satisfied.
2. Accordingly, the license is amended by changes to the Technical Specifications as indicated in the attachment to this license amendment, and paragraph 2.C.(2) of Facility Operating License No. NPF-3 is hereby amended to read as follows:
