ACRS 10:	

Dear Mr. Griffin:

On December 14, 1984, the Commission issued Amendment Nos. 88 and 60 to Facility Operating License Nos. DPR-51 and NPF-6 for Arkansas Nuclear One, Unit Nos. 1 and 2. The amendments revised the TS to incorporate the requirements of Appendix I of 10 CFR Part 50 as the Radiological Effluent Technical Specifications.

There were reproduction errors which resulted in a redistribution of the amendments on January 10, 1985. We have just determined that there were additional reproduction errors which resulted in the omission of page 8 from the Safety Evaluation for both units and the omission of TS pages XVII and 1-9 from Amendment No. 60 for NPF-6. In addition, there was a typographical error on the instruction sheet for Amendment No. 60.

Enclosed are (1) page 8 to the Safety Evaluation and (2) pages XVII and 1-9 to the TS included with Amendment No. 60 to NPF-6. Please correct the insertion instruction for page 6-34 to read 6-24.

Please accept our apologies for any inconvenience these errors may have caused.

Sincerely,

/s/
James R. Miller, Chief
Operating Reactors Branch No. 3
Division of Licensing

The proposed changes will not remove or relax any existing requirement needed to provide reasonable assurance that the health and safety of the public will not be endangered by operation in the proposed manner. The staff, therefore, finds the proposed changes acceptable.

4.0 ENVIRONMENTAL CONSIDERATION

These amendments involve a change in the requirements with respect to the use of facility components located within the restricted area as defined in 10 CFR Part 20 or a change in inspection or surveillance requirements. The staff has determined that the amendments involve no significant increase in the amounts, and no significant change in the types, of any effluents that may be released offsite, and that there is no significant increase in individual or cumulative occupational radiation exposure. The Commission has previously issued a proposed finding that these amendments involve no significant hazards consideration and there has been no public comment on such finding. Accordingly, these amendments meet the eligibility criteria for categorical exclusion set forth in 10 CFR 51.22(c)(9). Pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared in connection with the issuance of these amendments.

5.0 GENERAL CONCLUSION

We have concluded, based on the considerations discussed above, that:

(1) there is reasonable assurance that the health and safety of the public will not be endangered by operation in the proposed manner, and (2) such activities will be conducted in compliance with the Commission's regulations and the issuance of the amendments will not be inimical to the common defense and security or to the health and safety of the public.
