

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555

April 30, 1991

MEMORANDUM FOR: Sholly Coordinator

FROM: Thomas W. Alexion, Project Manager
Project Directorate IV-1
Division of Reactor Projects III, IV, and V
Office of Nuclear Reactor Regulation

Sheri R. Peterson, Project Manager
Project Directorate IV-1
Division of Reactor Projects III, IV, and V
Office of Nuclear Reactor Regulation

SUBJECT: REQUEST FOR PUBLICATION IN BIWEEKLY FR NOTICE - NOTICE OF CONSIDERATION OF ISSUANCE OF AMENDMENTS TO FACILITY OPERATING LICENSES, PROPOSED NO SIGNIFICANT HAZARDS CONSIDERATION DETERMINATION, AND OPPORTUNITY FOR HEARING (TAC NOS. 80229 AND 80230)

Entergy Operations, Inc., Docket Nos. 50-313 and 50-368, Arkansas

Nuclear One, Unit Nos. 1 and 2 (ANO-1&2), Pope County, Arkansas

Date of amendment request: April 18, 1991

Description of amendment request: The proposed amendments would revise the Technical Specifications (TS) to replace the title "Director, Operations" in each unit's Section 6.0, "Administrative Controls" with the title "General Manager, Plant Operations". The proposed amendments would also revise TS Sections 6.8.2 and 6.8.3 to replace "General Manager" with "Major Department Head".

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

CP 1

NRC FILE CENTER COPY

- (1) Involve a significant increase in the probability or consequences of an accident previously evaluated.

The proposed changes do not involve an increase in the probability or consequences of an accident previously evaluated because the change is administrative in nature. The technical qualifications of the organization remains the same.

These changes do not alter the configuration or operation of the facility. All Limiting Conditions of Operations, Limiting Safety Systems Settings and Safety Limits specified in the current Technical Specifications remain unchanged.

- (2) Create the possibility of a new or different kind of accident from any previously evaluated.

The safety analysis of the facility remains complete and accurate. There are no physical changes to the facility associated with these title changes and as such the plant conditions for which the design basis accidents have been performed are still valid. The plant operating and emergency procedures are unaffected with the possible exception of administrative changes to reflect the title changes. Therefore, the possibility of a new or different kind of accident from any previously evaluated is not created.

- (3) Involve a significant reduction in the margin of safety.

The margins of safety are established through the Limiting Conditions of Operations, Limiting Safety System Settings, and Safety Limits specified in the Technical Specifications. Since there are no changes to the physical design or operation of the facility, these margins will not be changed.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied.

Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.
