SUBJECT: REQUEST FOR WITHHOLDING INFORMATION FROM PUBLIC DISCLOSURE
(AW-02-1521 AND AW-02-1522)

Dear Mr. Corletti:

By two applications and associated affidavits dated April 15, 2002 (AW-02-1521 and AW-02-1522), executed by Mr. John S. Galembush for Mr. Hank A. Sepp, you submitted the following proprietary topical reports: WCAP-15785, Revision 0, "Probabilistic Evaluation of Turbine Valve Test Frequency," and WCAP-15783, Revision 0, "Analysis of the Probability of the Generation of Missiles from Fully Integral Nuclear Low Pressure Turbines," and requested that these documents be withheld from public disclosure pursuant to Title 10 of the *Code of Federal Regulations*, Section 2.790 (10 CFR 2.790). You submitted nonproprietary versions of these documents entitled WCAP-15786, Revision 0, "Probabilistic Evaluation of Turbine Valve Test Frequency," and WCAP-15784, Revision 0, "Analysis of the Probability of the Generation of Missiles from Fully Integral Nuclear Low Pressure Turbines." These nonproprietary versions have been placed in the Nuclear Regulatory Commission's (NRC's) Public Document Room and have been added to the Agencywide Documents Access and Management System Public Electronic Reading Room.

The affidavits stated that the submitted information should be considered exempt from mandatory public disclosure for the following reasons:

- (1) the information consists of supporting data, including test data, relative to a process (or component, structure, tool, method, etc.), the application of which data secures a competitive economic advantage, e.g., by optimization or improved marketability, and
- (2) use of the information by a competitor would reduce his expenditure of resources or improve his competitive position in the design, manufacture, shipment, installation, assurance of quality, or licensing a similar product.

We have reviewed your applications and the material in accordance with the requirements of 10 CFR 2.790 and, on the basis of your statements, have determined that the submitted information sought to be withheld contains proprietary commercial information and should be withheld from public disclosure. Therefore, the versions of the submitted information marked as proprietary will be withheld from public disclosure pursuant to 10 CFR 2.790(b)(5) and Section 103(b) of the Atomic Energy Act of 1954, as amended.

M. Corletti

- 2 -

Withholding from public inspection shall not affect the right, if any, of persons properly and directly concerned to inspect the documents. If the need arises, we may send copies of this information to our consultants working in this area. We will, of course, ensure that the consultants have signed the appropriate agreements for handling proprietary information.

If the basis for withholding this information from public inspection should change in the future such that the information could then be made available for public inspection, you should promptly notify the NRC. You also should understand that the NRC may have cause to review this determination in the future, for example, if the scope of a Freedom of Information Act request includes your information. In all review situations, if the NRC makes a determination adverse to the above, you will be notified in advance of any public disclosure.

If you have any questions regarding this matter, I may be reached at 301-415-3053.

Sincerely,

/RA/

Lawrence J. Burkhart, AP 1000 Project Manager
