The NRC recognizes the public's interest in the proper regulation of nuclear activities and is committed to understanding and including public input into our decisions. The NRC seeks to elicit public involvement early in the regulatory process so that safety concerns that may affect a community can be resolved in a timely and practical manner. This process is considered vital to assuring the public that the NRC is making sound, balanced decisions about nuclear safety. If you would like more information about NRC, please visit our web site at www.nrc.gov.

Please fold on the dotted lines with Business Reply side out, tape the bottom, and mail back to the NRC.

NRC is striving to improve its communications with the public and would appreciate any additional comments you may have on today's meeting:

I feel that the NRC is not giving due consideration to the unique dangers of Indian Point as a terrorist target because of its location in the most densely populated region of the country. Add to this the age of the plant and its operational deficiencies and I feel that the NRC is placing residents in danger.
