Paul, David:

We recently received several applications all with requested NRC completion dates bunched together, and allowing about 4-5 months of turnover:

<u>Application</u>	<u>Target date</u>
4/30/02 exemption (proprietary)	9/02
4/26/02 relief re. snubbers	10/1/02
4/26/02 amendment re. coupled neutronic..	9/30/02
4/19/02 relief re. service water pump...	10/1/02

From experience, these target dates could pose significant resource problems for NRC because (1) the durations are too short, and (2) they will form a bulge clogging work flow in the Division of Licensing Project Management. Please call me to discuss these target dates.

This e-mail does not formally request information, and does not formally convey an NRC staff position. The information is solely provided to prepare you for a conference call.

Peter S. Tam, Senior Project Manager
Project Directorate I-1
Division of Licensing Project Management
Office of Nuclear Reactor Regulation
