NRC Docket No. 50-289

SUBJECT: Revised Schedule for Responding to NRC Request for Additional Information Regarding Once -Through Steam Generator (OTSG) Acceptance Criteria for the Kinetic Expansion Area Eddy Current Examinations

The purpose of this letter is to revise the schedule commitment provided in our letter of September 21, 2001 for responding to the NRC's request for additional information (RAI) regarding the TMI Unit 1 acceptance criteria for eddy current examinations performed in the kinetic expansion region within the upper tubesheet of the Once -Through Steam Generator (OTSG) tubes dated August 24, 2001. As discussed with the NRC project manager, because of the additional steam generator inspections, repairs, and follow-up analysis required to support the 2001 Outage 1R14, our response to the RAI will be submitted on August 1, 2002.

Respectfully,

Michael P. Gallagher
Director, Licensing & Regulatory Affairs
Mid Atlantic Regional Operating Group
