Dr. William A. Travers

Executive Director for Operations

United States Nuclear Regulatory Commission

Washington, DC 20555-0001

Dear Dr. Travers:

I am a 45 year old mother of 5 who is fighting Hodgkin's Disease. I live in Bay Village, Ohio and I am very concerned about the effects of environmental pollution on myself & my family.

I am writing to ask that you keep the Davis Bessie plant permanently shut down. The last thing that we need in our environment is the leakage of nuclear radiation. Environmental pollution is a major contributing factor in developing Hodgkin's Disease. No one should have to endure

what I have been going through.
My future is uncertain, but it is
not too late to help our children
& future generations.

Please respond indicating your
plans for the Davis Besse Plant.

Sincerely,

M. Paula Motif
