

January 5, 1989

Docket No. 50-499

Mr. J. H. Goldberg  
Group Vice-President, Nuclear  
Houston Lighting & Power Company  
P. O. Box 1700  
Houston, Texas 77001

Dear Mr. Goldberg:

SUBJECT: ISSUANCE OF THE FULL-POWER LICENSE, SOUTH TEXAS PROJECT,  
UNIT 2 (STP-2)

Please provide us the date at which all low-power testing is expected to be completed and the date for which Houston Lighting & Power (HL&P) will request issuance of the full-power license for STP-2. We are presently using a licensing date of March 1, 1989 based on telephone conversations with your staff.

If March is still the targeted date, the time between issuance of the low-power and request for full-power license is short. Consequently it is imperative that close communication be maintained between HL&P and the NRC staff in order to achieve timely resolution of all outstanding items as was done prior to the low-power license. In order to proceed with the licensing in an orderly manner, we are scheduling completion of all known technical issues at least two weeks prior to the scheduled licensing date. HL&P submittals should be received approximately one month before the scheduled date of issuance of the full-power license so that the staff has adequate time to review them.

Sincerely,

*/s/*  
George F. Dick, Jr., Project Manager  
Project Directorate - IV  
Division of Reactor Projects - III,  
IV, V and Special Projects  
Office of Nuclear Reactor Regulation
