DOCKETED

'99 JUL 14 P4:37

The U.S. Nuclear Regulatory Commission (NRC) invites your comments on the proposed regulations for a proposed repository at Yucca Mountain.

ADJUDICATED

DOCKET NUMBER  
PROPOSED RULE  
2/19, 20 et al.  
(64 FR 8640)

1. What are your major concerns about the proposed criteria NRC is considering using to decide whether to license a repository at Yucca Mountain?

a. The initial stages of the evaluation called for a tremor free moisture free environment for the waste - as the evaluation progressed the criteria seemed to lighten.

~~as did the~~ The standards keep changing -

b. It seems that the County is scared of the spent fuel rods sitting in the yards of power plants, and the Federal government is BURYING the rods to make people of the nation feel safe. Oversight out-a-mind -

c. Even though it is unsafe and not the best answer for disposal -

2. What issues would you like NRC to address regarding its licensing requirements for the Yucca Mountain project?

That the state will allow the waste willingly -

3. In your opinion, how can NRC better respond to your concerns?

Get off the politics and start thinking about people.

4. Please make any comments about NRC's role that you think would be helpful.

Test a facility in one of the states that produces Nuke-powered and bury it next to a couple million people. If its so safe the desolation part of the yucca site shouldn't be a factor. Template = SECY-067

SECY-02

The U.S. Nuclear Regulatory Commission (NRC) invites your comments on the proposed regulations for a proposed repository at Yucca Mountain.

1. What are your major concerns about the proposed criteria NRC is considering using to decide whether to license a repository at Yucca Mountain?

a. The Yucca Mountain is unsuitable for a repository because of the earth quakes - because it is mainly sandstone - Because Yucca Mountain belongs to the Shoshoni people - is a sacred place - and the Shoshoni people do not want their mountain to store this poison.

c. what is acceptable risk?

2. What issues would you like NRC to address regarding its licensing requirements for the Yucca Mountain project?

The geology reports on Yucca Mt. LOOK at them!  
The land issue - Yucca Mt is SHOSHONI LAND!

3. In your opinion, how can NRC better respond to your concerns?

SHUT DOWN YUCCA MT REPOSITORY

~~SHUT~~

4. Please make any comments about NRC's role that you think would be helpful.

# WELCOME

The U.S. Nuclear Regulatory Commission (NRC) invites your comments on the proposed regulations for a proposed repository at Yucca Mountain.

1. What are your major concerns about the proposed criteria NRC is considering using to decide whether to license a repository at Yucca Mountain?

a. It appears, from listening to the presenters, this meeting's main objective was to convince the people a repository at Yucca Mt. is a good thing. That the NRC can protect the people.

b. This is not true.

Yucca Mt. is unstable. The people do not want nuclear waste stored in their back yard.

c. The Shoshoni, Paiute people do not want this. Yucca Mt. is Shoshoni land. We do not want our sacred ground filled with nuclear waste.

2. What issues would you like NRC to address regarding its licensing requirements for the Yucca Mountain project?

Ownership of Yucca Mt.

3. In your opinion, how can NRC better respond to your concerns?

I do not know if NRC is willing to respond.

4. Please make any comments about NRC's role that you think would be helpful.

# WELCOME

The U.S. Nuclear Regulatory Commission (NRC) invites your comments on the proposed regulations for a proposed repository at Yucca Mountain.

1. What are your major concerns about the proposed criteria NRC is considering using to decide whether to license a repository at Yucca Mountain?

a. Considering the fact there is a lot of earth quake activity at the test site & Yucca Mt. and the government continues to  
b. do sub critical testing of nuclear weapons, the proposed site is NOT a suitable repository for nuclear waste!  
c. Anyone concerned with public safety would ~~not~~ not approve Yucca Mt. for a repository.

2. What issues would you like NRC to address regarding its licensing requirements for the Yucca Mountain project?

the earthquake activity  
the continued sub critical tests

3. In your opinion, how can NRC better respond to your concerns?

~~Don't~~ Choose another site. Better yet, contain the nuclear waste on site until a way can be found to neutralize the waste.

4. Please make any comments about NRC's role that you think would be helpful.

Really be concerned with public health & safety. Do your job - not what you are told to do -

# WELCOME

The U.S. Nuclear Regulatory Commission (NRC) invites your comments on the proposed regulations for a proposed repository at Yucca Mountain.

1. What are your major concerns about the proposed criteria NRC is considering using to decide whether to license a repository at Yucca Mountain?

- a. I would like to have your white paper on the earthquake study mailed out in each packet requested here tonight, including
- b. bio. of author or authors. (site characterization)
- c. Highway transportation seems to be already happening here on local roads,

2. What issues would you like NRC to address regarding its licensing requirements for the Yucca Mountain project?

Owners of the land should ALL have to sign. Ownership must be settled FIRST.

3. In your opinion, how can NRC better respond to your concerns?

Leave waste where it is. Buy up the land where it is. Move the people to Nevada, (people have lived here thousands of years) a place of wonder + beauty

4. Please make any comments about NRC's role that you think would be helpful.

Quit your jobs and buy a good farm. Then you can call yourself earth stewards,  
(Candace Huxley) (Candace Huxley)

# WELCOME

The U.S. Nuclear Regulatory Commission (NRC) invites your comments on the proposed regulations for a proposed repository at Yucca Mountain.

1. What are your major concerns about the proposed criteria NRC is considering using to decide whether to license a repository at Yucca Mountain?

- a. Security and Sabotage. Sometimes I feel that the "tours" etc are not safe for the project at the current time,
- b. Much there is storage of radioactive wastes 'accidents' could happen! Would this make our area a prime target?

c. I'm not against the repository, just want it safe. To me the waste is here, we made it and now we have to take care of it. It's here, we need to direct the waste to a safe place for the world. Every country needs to address this.

2. What issues would you like NRC to address regarding its licensing requirements for the Yucca Mountain project?

We would like to make sure that the standard for Yucca Mt. does not set against locally established background radiation levels, not national levels, which is higher, we would like a written response.

3. In your opinion, how can NRC better respond to your concerns?

One on one contact, answering calls & letters, following them with questions and sending written responses such as #2 request.

4. Please make any comments about NRC's role that you think would be helpful.

Send response to Southern Nye County Conservation District  
PO Box 283  
Amargosa Valley NV 89020
