NUCLEAR POWER PLANT SITES IN CALIFORNIA

Attached is a file containing an exchange of correspondence between the General Manager and the ACRS in early 1960 relative to nuclear power plant sites in California. While these letters do not pertain to a specific application and as such are not included in the public record of any application, it is believed that the letters may be of general interest; for this reason, the attached file has been prepared to be made available with other material you have for public inspection.
