

WELCOME

DOCKETED
US NRC

The U.S. Nuclear Regulatory Commission (NRC) invites your comments on the proposed regulations for a proposed repository at Yucca Mountain.

DOCKET NUMBER
PROPOSED RULE **PR 2, 19, 20, et al**
(64FR8640)

APR 13 12:19

OFFICE OF THE
GENERAL COUNSEL
NRC
WASHINGTON, DC 20540

1. What are your major concerns about the proposed criteria NRC is considering using to decide whether to license a repository at Yucca Mountain?

- a. That they transfer nuclear wastes through our pollution-free valley.
- b. What happens to our property value.
- c. Why can't they transfer the waste through towns who want it.

2. What issues would you like NRC to address regarding its licensing requirements for the Yucca Mountain project?

Why are they showing this waste down our throats?

3. In your opinion, how can NRC better respond to your concerns?

By listening to the people who do not want this in our neighborhoods

4. Please make any comments about NRC's role that you think would be helpful.

Why didn't they work on this stupid problem years ago. Don't it just like the Government to pass unpopular issues on and on until ~~we~~ they are stuck for an answer.
