

The Nuclear Regulatory Commission has issued a Proposed Rule 10 CFR Part 63 , regarding the licensing of a proposed geologic repository at Yucca Mountain, Nevada.

DOCKETED
USNRC

DOCKET NUMBER
PROPOSED RULE

PR 2,19 20 et al Attention NRC:
(64 FR 8640)

My/our major concerns and comments about the proposed criteria NRC is considering using to decide whether to license a repository at Yucca Mountain are:

→ Radionuclides released from Yucca Mountain will primarily be in the groundwater. The groundwater protection standard in the federal Safe Drinking Water Act is 4 millirems (mrem). The NRC proposing a 25 mrem standard overall which includes groundwater (63.113).

Is this too high X too low acceptable Comments: LONG TERM STUDIES HAVE NOT BEEN DONE ON THIS!

→ The rule (63.115 and 63.113(b)) proposes determining compliance with the maximum radiation dose standard at a boundary 12 miles from the emplacement area. For comparison purposes, the Swedish government sets the boundary at the edge of the waste emplacement area. At DOE's Waste Isolation Pilot Project in N.M., the boundary is 5 kilometers (3 miles).

believe the Yucca Mountain compliance boundary should be :
 at emplacement area 3 miles away X 12 miles away

Comments:

→The rule (63.41) says that NRC can issue the repository license to receive waste and allow waste to be put into the repository once it determines that there is enough underground storage space for "initial operation".

Do you think the rule should permit DOE to put waste in the repository before construction is completed? Yes X No

Comments:

→The proposed rule (63.115) states that the NRC allowable maximum standard is determined based on the risk to an adult. I agree X disagree that the standard should be based on risk to an adult. Comment:

Additional Comments: CHILDREN ARE AD'VERSLY AFFECTED MORE EASILY THAN ADULTS! THE STANDARDS ARE UNACCEPTABLE AND ENTIRELY TOO LOW!

LOOK AT THE TRAGEDIES FROM 3 MILE ISLAND THE SUFFERING GOES ON AND ON. STORE ON SITE DO NOT SHIP NUCLEAR WASTE
