Dear Mr. Brabrand:

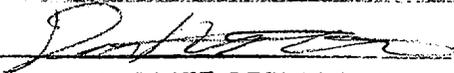

We have been requested to provide information to the U.S. Nuclear Regulatory Commission (NRC) related to the evaluation of the ecological resources at the subject property. The NRCs requested information on threatened or endangered species (plants and animals) known to occur, or that could potentially occur and a qualitative estimate of the importance of habitat of threatened, endangered species in the remediation area. In addition, the NRC requested that the source of information and time frame in which it was collected should be identified.

Attached is a copy of the topological map for the site for your use. Thank you for your assistance. If you have any questions, please feel free to give me a call at (405) 270-2665.
