Docket No. 50-298

December 5, 1988

Mr. George A. Trevors, Division Manager - Nuclear Support Nebraska Public Power District Post Office Box 499 Columbus, Nebraska 68601

Dear Mr. Trevors:

SUBJECT: COOPER NUCLEAR STATION - SCHEDULAR EXEMPTION FOR PROPERTY INSURANCE REQUIREMENTS

The Commission has issued the enclosed Exemption from certain requirements of Section 50.54(w)(1) to 10 CFR Part 50 for the Cooper Nuclear Station. This action responds to your counsel's request dated November 4, 1988. The Exemption is valid from December 5, 1988 through June 4, 1990.

We have determined that the Exemption is necessary and authorized by law and should therefore be granted.

The Exemption is being forwarded to the Office of the Federal Register for publication. The related Notice of Environmental Assessment and Finding of No Significant Impact was published in the Federal Register on December 5, 1988. A copy is enclosed for your information.

Sincerely,

Jose/A. Calvo, Director Project Directorate - IV Division of Reactor Projects - III, IV, V and Special Projects Office of Nuclear Reactor Regulation

NUCLEAR REGULATORY COMMISSION

In the Matter of )
NEBRASKA PUBLIC POWER DISTRICT ) Docket No. 50-298
(Cooper Nuclear Station, Unit 1) )

EXEMPTION

I.

Nebraska Public Power District (the licensee) is the holder of Facility Operating License No. DPR-46 that authorizes operation of the Cooper Nuclear Station, 1 (the facility) at a steady state reactor power level not in excess of 2381 megawatts thermal. The facility is a boiling water reactor (BWR) located at the licensee's site in Nemaha County, Nebraska. The license provides, among other things, that the facility is subject to all rules, regulations and orders of the Commission now or hereafter in effect.

II.

Section 50.54(w)(1) of 10 CFR Part 50 requires that licensees of nuclear power reactors maintain a minimum property insurance coverage for operating nuclear power plants in the sum of $1.06 billion.

By letter dated October 2, 1987, the licensee, by its attorney, requested a schedular exemption from the full requirements of 10 CFR 50.54(w)(1) until a satisfactory final order from a state or Federal court has been obtained and the licensee is able to obtain the necessary insurance policies from Nuclear Electric Insurance Limited (NEIL). Currently, the licensee maintains $750 million of property insurance obtained through American Nuclear Insurers (ANI) and the Mutual Atomic Energy Reinsurance Pool (MAERP). The only source
of additional insurance to comply with the Commission's new regulations is NEIL. However, NEIL is a mutual company and under the provisions of the Nebraska Constitution, as interpreted by the Nebraska Supreme Court, there is considerable doubt as to whether the licensee may lawfully purchase insurance from NEIL. In an effort to satisfy the limitations of Nebraska law, effective on March 29, 1985, NEIL amended its charter and by-laws, together with a proposal to issue appropriate policy endorsements. Based upon NEIL's actions, the licensee submitted an application to NEIL for decontamination and property insurance. By letter from NEIL dated June 28, 1985, the licensee was advised NEIL would not issue a policy to the licensee until the licensee had secured a declaratory judgment from the Nebraska Supreme Court that non-voting membership in NEIL and the issuance of policies with appropriate endorsements would not violate the Nebraska Constitution. On July 1, 1985, the licensee, jointly with the Omaha Public Power District (the Districts), commenced an action for a declaratory judgment in the District Court of Lancaster County, Nebraska. The District Court issued its decision on December 1, 1986 in which it declined to grant a declaratory judgment. The Districts appealed the ruling of the District Court to the Nebraska Supreme Court. On September 9, 1988, the Nebraska Supreme Court denied the District's request for a declaratory judgment that the Districts may, consistent with Nebraska law, purchase insurance from NEIL. The Districts assert they plan to appeal the Nebraska Supreme Court's ruling. If such appeal fails, they plan to commence an action for a declaratory judgment in the United States District Court in Nebraska and ask the Federal court to declare that the Commission's new regulations preempt any provisions of the Nebraska Constitution.
In this regard, the Districts estimate that if, as appears necessary, they must seek a declaratory judgment from the United States District Court, that process would likely require approximately 18 months. As a result, the Districts continue to be unable to comply with § 50.54(w)(1) and, by letter dated November 4, 1988, have requested renewal of their temporary exemption until a satisfactory order from a state or Federal court has been obtained and NEIL has issued the necessary policies.

III.

The NRC staff has reviewed the licensee's request for renewal of a schedular exemption from the requirements of 10 CFR 50.54(w)(1). The licensee has reasserted, and the Commission has found, 52 FR 28966, that it is unable to provide equivalent protection in lieu of purchasing the NEIL coverage. NEIL coverage cannot be secured until a satisfactory final order from either a state or Federal court is obtained. For these reasons, the staff finds that the licensee has shown good cause for the requested renewal of the schedular exemption from the full requirements of 10 CFR 50.54(w)(1). However, the staff does not believe the exemption should be for an indefinite period. Accordingly, the requested schedular exemption is acceptable for a period of eighteen months from December 5, 1988. If an appropriate state or Federal court order has not been obtained by such date, the staff would give consideration to a new application for an exemption.

IV.

Accordingly, the Commission has determined that, pursuant to 10 CFR 50.12(a)(1), this exemption is authorized by law, will not present an undue
risk to the public health and safety and is consistent with the common defense
and security. The Commission further determines that special circumstances, as
provided in 10 CFR 50.12(a)(2)(v), are present justifying the exemption. The
licensee has been making, and continues to make, a good faith effort to secure
the necessary state or Federal court order. Upon securing the necessary court
order, the licensee intends to purchase the insurance policy from NEIL which
would put it in compliance with the requirements of 10 CFR 50.54(w)(1).

Accordingly, the Commission hereby grants an exemption, as described in
Section III above, from Section 50.54(w)(1) of 10 CFR Part 50 to extend the
date for acquiring the full amount of property insurance required by the Commis-
sion's regulations to no later than eighteen months from December 5, 1988.
The licensee is exempt from purchasing property insurance in excess of that
available from ANI/MAERP.

Pursuant to 10 CFR 51.32, the Commission has determined that the granting
of this Exemption will have no significant impact on the environment (53 FR 48992).
This exemption is effective upon issuance.

Dated at Rockville, Maryland this 5th day of December, 1988.

FOR THE NUCLEAR REGULATORY COMMISSION

Gary M. Holahan, Acting Director
Division of Reactor Projects - III,
IV, V and Special Projects
Office of Nuclear Reactor Regulation
The U.S. Nuclear Regulatory Commission (NRC or the Commission) is considering issuance of an exemption from the requirements of 10 CFR 50.54(w)(1) to the Nebraska Public Power District (the licensee) for the Cooper Nuclear Station located in Nemaha County, Nebraska.

ENVIRONMENTAL ASSESSMENT
Identification of Proposed Action:

The licensee would be partially exempted from the requirement of 10 CFR 50.54(w)(1) from December 5, 1988 through June 4, 1990. 10 CFR 50.54(w)(1) requires that licensees have property damage insurance in the amount of at least $1.06 billion to provide financial security for stabilizing and decontaminating their licensed reactors in the event of an accident.

The Need for the Proposed Action:

The licensee is a political subdivision of the State of Nebraska and, as such, is prohibited by state law from becoming a subscriber to the stock or any portion of interest of any corporation or association. The licensee is therefore prohibited from becoming a member of Nuclear Electric Insurance Limited (NEIL). As a result, the licensee is unable to obtain the entire $1.06 billion of property insurance as required by the rule. The licensee is seeking a declaratory judgement from United States District Court which will enable it to become a NEIL member. Until such time, the maximum amount of property insurance available to the licensee is the $750 million available from the American Nuclear
Insurers (ANI) and the Mutual Atomic Energy Reinsurance Pool (MAERP). The requested exemption will grant the licensee additional time to obtain the necessary ruling.

Environmental Impacts of the Proposed Action:

The proposed action affects only insurance requirements and will have no effect on nuclear safety or on plant effluents. Therefore, the Commission has determined that there is no environmental impact associated with the proposed action.

Alternative Use of Resources:

This action involves no use of resources.

Agencies/Persons Consulted

The NRC staff did not consult other agencies or persons.

FINDING OF NO SIGNIFICANT IMPACT:

The Commission has determined not to prepare an environmental impact statement for the proposed action.

For further details with respect to this action, see the licensee's application dated November 4, 1988, which is available for public inspection at the Commission's Public Document Room, 2120 L Street, N.W., Washington, D.C., 20555, and at the Local Public Document Room in the Auburn Public Library, 1118 15th Street, Auburn, Nebraska 68305.

Dated at Rockville, Maryland, this 30th day of November, 1988.

FOR THE NUCLEAR REGULATORY COMMISSION

Paul W. O'Connor, Acting Director
Project Directorate - IV
Division of Reactor Projects - III, IV, V and Special Projects
Office of Nuclear Reactor Regulation
