# Petition to Increase Protection of Spent Rods At Indian Point

To: U.S. Nuclear Regulatory Commission Chair Richard Meserve  
Entergy Nuclear Northeast CEO Michael Kansler

The spent fuel rods at Indian Point are housed in a steel-roofed facility. I believe this facility should be stronger and reinforced for the public's protection and safety in these uncertain times. I/we call on you to do just that.

# Petition to Increase Protection of Spent Rods At Indian Point

To: U.S. Nuclear Regulatory Commission Chair Richard Meserve  
Entergy Nuclear Northeast CEO Michael Kansler

The spent fuel rods at Indian Point are housed in a steel-roofed facility. I believe this facility should be stronger and reinforced for the public's protection and safety in these uncertain times. We call on you to do just that.

Name Carmen + Kevin McCallum Name \_\_\_\_\_

Address In addition to my comments below, I don't believe reinforcing a steel roof would be enough.!! at the very least regular maintenance needs to be done.!! (to avoid another incident like the one on East February)
