CHAIR
Subcommittee on Rural Health

SANDRA R. GALEF
Assemblywoman 90th District

May 7, 2002

Richard A. Meserve, Chairman
US Nuclear Regulatory Commission
1 White Flint North
11555 Rockville Pike
Rockville, Maryland 20852

Dear Chairman Meserve:

I have enclosed petitions primarily from residents of my Assembly District calling for increased protection of the spent fuel rods at Indian Point. Within a short period of time, there were 1211 residents who have signed these petitions.

The concern that has been expressed by the public regarding the safety at Indian Point over the past few months has not subsided. In fact, the willingness of the residents living around the nuclear plants in Buchanan, New York to sign these petitions demonstrates the need to make the plants as safe as possible and to require all measures that will insure the safety of the public. I, along with 1211 other residents, believe that the steel-roofed spent fuel rod facility at Indian Point should be stronger and reinforced for the public's protection and safety in these uncertain times. There must be no compromise on safety.

We are asking that you require Entergy Nuclear Northeast, the owner of Indian Point, to start the process of strengthening the storage facility of the spent fuel rods immediately.

I look forward to an affirmative response to our request.

Sincerely,

Sandra R. Galef

CC: Michael Kansler, CEO Entergy Nuclear Northeast

02 MAY 10 PM 3: 31

CHAIRMAN REC'D

Petition to Increase Protection of Spent Rods At Indian Point

To: U.S. Nuclear Regulatory Commission Chair Richard Meserve
Entergy Nuclear Northeast CEO Michael Kansler

The spent fuel rods at Indian Point are housed in a steel-roofed facility. I believe this facility should be stronger and reinforced for the public's protection and safety in these uncertain times. I/we call on you to do just that.

Name Catnyann Costantino. Name _____

Address 37 Linden Ave.

Please use this space to give me your thoughts on Indian Point: IF should be closed. It is an old facility and has had problems prior to 9/11/01. I don't believe those who say it is so safe live near it. Convert the facility to gas or coal. It could be done. If not store the spent fuel rods in a shed near Mr Kansler's home and then see how quick changes would be made.
John Fitzgerald

Petition to Increase Protection of Spent Rods At Indian Point

To: U.S. Nuclear Regulatory Commission Chair Richard Meserve
Entergy Nuclear Northeast CEO Michael Kansler

The spent fuel rods at Indian Point are housed in a steel-roofed facility. I believe this facility should be stronger and reinforced for the public's protection and safety in these uncertain times. I/we call on you to do just that
