

DIVISION OF MOSQUITO CONTROL

MEMORANDUM

---

TO: Stacy Foster, FPL  
FROM: James R. David, Mosquito Control Director  
DATE: April 10, 2002  
SUBJECT: Rivulus marmoratus

The general habitat requirements of Rivulus marmoratus at the FPL site include their use of Land crab holes along the margins of the wetlands on-site. As long as the re-permitting of the nuclear plant involves no wetland loss, and the current protection and preservation continues, there should be no impact of re-permitting on the habitat of the referenced listed species on site.

Please let me know if you require anything further.
