## Change Summary

### TMI MODIFIED AMENDED PHYSICAL SECURITY PLAN REV 44

#### Specific Change

Page 14.0; section 4.6.1, the following paragraph is added to the end of the section:

Temporary background investigations completed using an acceptable alternate method to initially obtain a DD214 copy, may be considered a full background investigation prior to receipt of the DD214 from the National Personnel Records Center, providing satisfactory completion of all other elements required for a full background investigation.

#### Reason for Change

This change allows for the using of an alternate method to obtain a DD214 copy while awaiting the original from the NPRC.

#### Justification

Regulatory Guide 5.66 and NUMARC 89-01 currently require that the military records be obtained from the National Personnel Records Center. However, NRC guidance from Samuel J. Collins (Director of the Office of Nuclear Regulation) in a letter dated November 14, 2001, provides NRC approved alternate methods that would expedite the closure of the background investigation.
