Executive Director

Mr. Harold L. Price, Director
Division of Licensing and Regulation
Atomic Energy Commission
Washington 25, D. C.

Dear Mr. Price:

I have noted with interest a brief report in the February issue of Nucleonics Magazine (p.29) pertaining to the intention of your Hazards and Evaluation Branch to publish guides in preparing hazards analyses.

This Commission is actively cooperating with several industrial firms interested in establishing a high flux test reactor for performing irradiation services, as invited by AEC on the 12th of last month. In respect to this project we are at the stage of retaining a professional engineering firm to prepare a detailed site analysis, from the safety point of view, for two sites within the State.

We have prepared tentative specifications for the project and are anxious to get the survey underway. You can appreciate, however, the effect that the issuance of your criteria, etc., might have on the substance and form that such specifications and report itself, might embody. For this reason, I will appreciate hearing from you concerning the status of your project and how this Commission might obtain a copy of the regulations when complete.

Due to our time requirements in providing site data to the interested industrial firms, I will appreciate any assistance you can give in expediting this request.

Sincerely,

Karl R. Allen
Nuclear Industrial Specialist
