Mr. William Cavanaugh, III  
Vice President, Generation  
and Construction  
Arkansas Power & Light Company  
P. O. Box 551  
Little Rock, Arkansas 72203

Dear Mr. Cavanaugh:

*R. Licciardo*

The Nuclear Regulatory Commission has issued the enclosed Amendment No. 19 to Facility Operating License No. NPF-6 for the Arkansas Power and Light Company for the Arkansas Nuclear One, Unit 2 plant. The amendment consists of changes to the Technical Specifications in response to your application dated August 13, 1980.

The amendment revised Appendix A Technical Specifications by providing further clarification of the term OPERABLE as it applies to the single failure criterion for safety systems. During our review of the proposed changes, we found that certain modifications to your proposed Technical Specifications were necessary to meet our requirements. The changes were discussed with your staff and with their agreement were included in this amendment.

Copies of the Safety Evaluation and the Notice of Issuance are also enclosed.

Sincerely,

Original signed by  
*Robert A. Clark*  
Robert A. Clark, Chief  
Operating Reactors Branch #3  
Division of Licensing
