W. D. LEGGETT, JR.
VICE PRESIDENT-ENGINEERING

July 1, 1959

Mr. Harold L. Price, Director
Division of Licensing and Regulation
U. S. Atomic Energy Commission
Washington 25, D. C.

Dear Mr. Price:

Since receiving the proposed rule making on reactor site criteria and making the general comments in my letter of June 16, we have continued to give the matter consideration. We have also attended the recent Atomic Industrial Forum meeting on the subject, at which the views of many different participants in the atomic energy program were discussed.

As a result of this further attention, I should like to go on record as supporting the position developed at the Atomic Industrial Forum session. It seems pretty generally agreed that it is premature to contemplate rule making at the present time, but that a statement of policy and considerations involved in reactor hazards analysis (including siting problems) should be published by the Commission in the near future.

Sincerely yours,

W. D. Leggett, Jr.
