**GENERAL ELECTRIC**  
COMPANY  
SCHENECTADY, NEW YORK

F. K. MCCUNE  
VICE PRESIDENT-ATOMIC BUSINESS DEVELOPMENT  
MARKETING SERVICES

August 12, 1959

Mr. Harold L. Price, Director  
Division of Licensing and Regulation  
U. S. Atomic Energy Commission  
Washington, D. C.

Dear Mr. Price:

The following are my comments on the proposed AEC regulation  
(10 CFR Chapter 1) -- Power and Test Reactors.

Representing the General Electric Company I attended the Atomic  
Industrial Forum meeting on June 30 at which the question of siting power and  
test reactors was discussed. At this meeting, chaired by Mr. Sporn, an  
attempt was made to develop a consensus of industrial opinion, weighing the  
various factors which the Government experts presented to us, as well as our  
own experiences.

This information has been transmitted to you by the Executive  
Manager of the Forum. Since that time I have been on a trip abroad, but  
on again reviewing the matter I believe that the consensus worked out at  
the Forum fully and accurately represents our Company's position far  
better than any specific comments which I could make. Hence I would like  
to endorse on behalf of the General Electric Company the resolutions which  
you have received.

Very truly yours,

*Frank*
