U.S. Nuclear Regulatory Commission  
ATTENTION: Document Control Desk  
Washington, D.C. 20555-0001

Subject: Duke Energy Corporation  
Catawba Nuclear Station Unit 1  
Docket No.: 50-413  
Core Operating Limits Report (COLR)  
Catawba Unit 1 Cycle 14, Revision 22

Attached, pursuant to Catawba Technical Specification 5.6.5, is an information copy of the Core Operating Limits Report for Catawba Unit 1 Cycle 14. The Unit 1 COLR is being revised to update the limits of the new Catawba 1 Cycle 14 reload core.

The COLR Appendix A power distribution monitoring factors is included with the letter to the NRC Document Control Desk within the CD-ROM.

The attachment and CD do not contain any new commitments.

Please direct any questions or concerns to George Strickland at (803) 831-3585.

Sincerely,

G. R. Peterson
