SUBJECT: PROPOSED LETTER TO JCAE REGARDING SITE CRITERIA

The collection of materials attached to the letter to the JCAE which we have prepared for the Chairman's signature is a little bit unusual. For example, it would be hard to describe some of the communications from the ACRS as "reports". It may be that, in supplying the JCAE with this material, we are going a bit further than some might consider to be either necessary or desirable. It is my considered judgment, however, that failure to supply this material to the Joint Committee as soon as possible, now that the proposed site criteria are out for public comment, would run a serious risk of injecting this whole matter into a lot of unnecessary controversy. I therefore recommend that the material be transmitted to the Joint Committee as promptly as possible.
