FEB 21 1961

Dr. H. M. Glass
British Standards Institution
British Standards House
2 Park Street
London, W. 1, England.

Dear Dr. Glass:

Reference your letter ISO/TC 85 SC3 W1, dated 14 February, 1961, it will be a pleasure to have at our meeting the representatives you have suggested for the working group on reactor siting of TC 85.

There will be no exchange of papers in advance of this meeting, and the character of the meeting will be largely an off-the-cuff discussion and planning for a more complete meeting at some time in the near future. I hope we will be able to discuss informally some papers on reactor siting which various members may have in preparation or in draft form, but I do not expect that there will be any occasion for formal action of any kind.

For your information, I am enclosing herewith two copies of a recently published proposed regulation on reactor site selection in the United States.

Sincerely yours,

Clifford K. Beck
Assistant Director
Nuclear Facilities Safety
Division of Licensing & Regulation

Enclosure:
2 copies AEC D-38

A/S31
