Subject: DRAFT CONSOLIDATED GUIDANCE ABOUT MEDICAL USE LICENSES - NUREG 1556 VOLUME 9

4/5/02
 67 FR 16467
 (12)

The Iowa Department of Public Health has reviewed the subject guidance. It was noted that the Draft Guidance is approximately twice the size of the previous version. Although there is a benefit to presenting a single source for medical uses, it would appear that there may be an advantage to publishing guidance that is "modality specific." For example, licensees using radiopharmaceuticals for only diagnostic purposes might find the draft guide cumbersome. Further, mobile medical services, which are also included, would appear to have a limited interest in Volume 9 as a whole.
