Ms. Frant, Mr. Cameron, Mr. Broseus,

I gave Ms. Frant a copy of an article I wrote with Dan Miron on decontamination trigger levels. I had wanted to send or give a copy of another article, "Nuclear Medicine Survey Recommendations for a Changing Regulatory Environment" that I wrote with Tom Schumacher. Knowing that your mail is a month in arrears it didn't seem too efficient to send you a hard copy. It was published in the November 2001 "Operational Radiation Safety" supplement to the Health Physics Journal. I would be happy to fax a copy to any of you or other NRC staff interested.

I hope you don't mind the shotgun approach of this message.

Any opinions expressed in this message are mine alone and do not necessarily represent those of the Denver VA Medical Center, The Department of Veterans Affairs, or the United States Government.
