Docket FILE

Mr. D. F. Schnell
Vice President - Nuclear
Union Electric Company
P. O. Box 149
St. Louis, MO 63166

Dear Mr. Schnell:

Subject: Callaway Plant, Unit 1 - Amendment No. 3 to License NPF-30

The Commission has issued the enclosed Amendment No. 3 to Operating License NPF-30 for the Callaway Plant, Unit 1. The amendment consists of changes to the Technical Specifications in response to your application dated October 8, 1984, which requested two modifications to the Administrative Controls Section.

The amendment approves a modification to Figure 6.2-2 of the Callaway Technical Specifications consisting of the addition of two managerial positions to the plant organization. The amendment also approves a modification to Section 6.5.1.2 consisting of the addition of another member to the On-Site Review Committee.

A copy of the related Safety Evaluation is enclosed. The notice of issuance will be included in the Commission's next regular monthly Federal Register Notice.

Sincerely,

LSI

B. J. Youngblood, Chief
Licensing Branch No. 1

UNION ELECTRIC COMPANY

DOCKET NO. 50-483

CALLAWAY PLANT, UNIT 1

AMENDMENT TO FACILITY OPERATING LICENSE

Amendment No. 3
License No. NPF-30

1. The Nuclear Regulatory Commission (the Commission) has found that:
 - A. The application for amendment by Union Electric Company (the licensee), dated October 8, 1984, complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations set forth in 10 CFR Chapter I;
 - B. The facility will operate in conformity with the application, the provisions of the Act, and the rules and regulations of the Commission;
 - C. There is reasonable assurance (i) that the activities authorized by this amendment can be conducted without endangering the health and safety of the public; and (ii) that such activities will be conducted in compliance with the Commission's regulations;
 - D. The issuance of this amendment will not be inimical to the common defense and security or to the health and safety of the public; and
 - E. The issuance of this amendment is in accordance with 10 CFR Part 51 of the Commission's regulations and all applicable requirements have been satisfied.
2. Accordingly, the license is amended by a change to the Technical Specifications as indicated in the attachment to this license amendment and Paragraph 2.C.(2) of Operating License No. NPF-30 is hereby amended to read as follows:

(2) Technical Specifications and Environmental Protection Plan

The Technical Specifications contained in Appendix A, as revised through Amendment No. 3, and the Environmental Protection Plan contained in Appendix B, both of which are attached hereto, are hereby incorporated into this license. UE shall operate the facility in accordance with the Technical Specifications and the Environmental Protection Plan.

SAFETY EVALUATION BY THE OFFICE OF NUCLEAR REACTOR REGULATION
SUPPORTING AMENDMENT NO. 3 TO FACILITY OPERATING LICENSE NO. NPF-30

UNION ELECTRIC COMPANY

CALLAWAY PLANT, UNIT 1

DOCKET NO. STN 50-483

1.0 INTRODUCTION

By letter dated October 8, 1984, Union Electric Company (the licensee) requested an amendment to Facility Operating License No. NPF-30 for operation of the Callaway Plant in Callaway County, Missouri.

The amendment would modify Figure 6.2-2 of the Callaway Technical Specifications (TS) to include the addition of two managerial positions to the plant organization. The amendment would also modify Section 6.5.1.2 consisting of the addition of another member to the On-Site Review Committee.

2.0 EVALUATION

The licensee has created two new managerial positions, entitled "Assistant Manager, Administrative" and "Superintendent, Outages," both reporting to the Manager, Callaway Plant. The former is responsible for certain administrative and personnel matters. The latter is responsible for all aspects of outage planning and scheduling. The licensee's intent is to enhance plant operations by segregating general administration and outage planning as separate segments of the plant organization, thereby allowing the operating departments to concentrate on their primary responsibilities.

The staff concludes that the organization changes described above are primarily administrative and do not decrease the scope or number of plant functions and responsibilities. The staff concurs that the reassignment of general administrative and outage planning duties as separate and segregated responsibilities should enhance plant operations.

The On-Site Review Committee (ORC) is composed of the Chairman and six members as follows:

B502110463 B50130
PDR ADOCK 05000483
P PDR

Chairman: Manager, Callaway Plant
Member: Asst. Manager, Operations and Maintenance
Member: Asst. Manager, Technical Services
Member: Asst. Manager, Support Services
Member: Superintendent, Health Physics
Member: Supervising Engineer, Quality Assurance
Member: Advisor to the Manager, Callaway Plant

The licensee has proposed to add the Assistant Manager, Administrative, as a seventh member. At the present time, this change will not affect the actual composition of the ORC because (1) the new Assistant Manager, Administrative, was formerly the Assistant Manager, Operations and Maintenance, and (2) the incumbent Advisor to the Manager, Callaway Plant, has been assigned a dual role as the new Assistant Manager, Operations and Maintenance. In other words, the current ORC is comprised of seven individuals (including the Chairman) and the proposed ORC will be comprised of the same seven individuals (the positions of Advisor to the Manager, Callaway Plant and Assistant Manager, Operations and Maintenance are held by the same person). It is possible that future organizational changes will result in an ORC comprised of eight individuals; however, the licensee may eventually decide to abolish the position of Advisor to the Manager, Callaway Plant, which will bring the Committee back to its current size of one Chairman and six members.

The staff concludes that the proposed change does not decrease the size and effectiveness of the ORC and is, in effect, an administrative change to accommodate the organizational change previously described.

Based on the above, we conclude that the licensee's proposal to change the Unit Organization and the composition of the On-Site Review Committee is acceptable.

3.0 ENVIRONMENTAL CONSIDERATION

This amendment involves a change in the installation or use of a facility component located within the restricted area as defined in 10 CFR Part 20. The staff has determined that the amendment involves no significant change in the types or significant increase in the amounts of any effluents that may be released offsite, and that there is no significant increase in individual or cumulative occupational radiation exposure. The Commission has previously issued a proposed finding that this amendment involves no significant hazards consideration and there has been no public comment on such finding. Accordingly, this amendment meets the eligibility criteria for categorical exclusion set forth in 10 CFR Section 51.22(c)(9). Pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared in connection with the issuance of this amendment.

4.0 CONCLUSION

We have concluded, based on the considerations discussed above, that:

- (1) there is reasonable assurance that the health and safety of the public will not be endangered by operation in the proposed manner; and
- (2) such activities will be conducted in compliance with the Commission's regulations and the issuance of this amendment will not be inimical to the common defense and security or to the health and safety of the public.
